To all:

We will discuss all the deliverables you just mentioned once you forward all the materials for our review before the call. Any question can be addressed before or during the call. We'll use the call to polish or finalize last minute items.

Ana- I apologize for excluding you, sorry. I added you to my group now- you'll be included in the future. Elena, please make sure she receive all information for the call.

Thanks,

Arlene

Hi Arlene,

Thanks for touching base w/us. Jill's out today but I can give you some brief updates regarding her letter health consultation. Her draft is nearly complete and should be ready to share with you all before the meeting on the 16th. We may even be able to share with you our general recommendations as early as next week.

Regarding the PAS and messaging, we have nearly completed a site-specific health-based fact sheet that we intend to distribute and use during the outreach. This has to make it's way through clearance, and then get translated into Spanish and Chinese but we hope to have that squared away in time for the outreach. We may be able to share w/you a draft of our fact sheet by next week as well.

We will likely have to have more discussion on the issue of frequency of sampling and it will be good for us to hash this out before we finalize our recommendations.

Finally, will you please include Ana Pomales, our health educator, on all future correspondence regarding PAS? Her email is [Pomales.Ana@epamail.epa.gov](mailto:Pomales.Ana@epamail.epa.gov).

Thanks, Arlene. Enjoy the vacation!

Elena

Hi ladies,

I want to make sure we stay focus during our meeting.

Will ATSDR be ready to discuss your assessment by the date I selected? Additionally, we you be able to discuss and/or hand out a draft of your recommendations, or potential message? If not, please advise immediately.

With this, I want to plan out our strategy for PAS. There are new conflicts for me with April 23 and the first week of May.

I would like to have an agreement for frequency of sampling since rainy season doesn't really exist in Puerto Rico as we know it in the mainland; they don't have basements; and they don't have crawl spaces. CEPD have recommended to state a frequency during the PAS and I agree based on their reaction to us in the past, they want very clear and specific facts. Finance is a major factor that must be considered in our decision.

Again, this is for the Phase 1 portion of the Site. Should we have Phase 2, we'll brush through the major issues that the assessors may see and problems you may have like need maps of EDD spread sheet, etc....

We will another meeting to discuss Phase 2 in the same format described above.

Should you want to add other issues, please advise. I am on vacation starting today and April 9 through the 13th is my jury duty. I'm available via emails and cell for logistical discussions.

Thanks,

Arlene
